

Assessment Student Instructions

Government of
South Australia

Instructions

Before attempting the assessment task, you must

- Review ITWorks System Administration Manual and all related policies and procedures, listed in that document.
- Install the latest version of VMware Workstation on your PC
- Obtain the “PC1” virtual machine from the NAS and create a local copy. Follow the instructions provided on the IT Studies Home page on how to access NAS.
- VM is encrypted, use password “Password1” to access it.

For this assessment you will require the following credentials:

Username: ICT

Password: Password1

Username: Strutzj

Password: Password1

Scenario

You are working for the ITWorks in the role of Technical Analyst. ITWorks Help Desk has received a phone call from the staff member Jim Strutz. He has some concerns regarding “safe (and comfortable at late hours)” internet browsing. He wants to have the Mozilla Firefox browser installed on his PC and customised with some security measures. You have been assigned to that job.

The user request has been classified as “Low priority”. Refer to Customer Service Policy / Service Level Agreement in ITWorks Systems Administration Manual.pdf document for response time to service-related incidents. You must take responsibility for planning, sequencing, and prioritizing tasks and your workload for efficiency and effective outcomes.

Your task is to fulfill the request and upon completion respond to the client (jim.strutz@itworks.com.au) according to organisational procedures (see ITWorks Systems Administration Manual.pdf “Response Procedure”).

You will access Jim’s PC directly, while he is in his office, to perform required tasks, and complete the request according to organisational procedure.

User Request: R-000733

Install and configure the application.

To complete the task, follow the steps below and take a screenshot after completing each task. Make sure all the screenshots display the virtual machine name tab, and these are not overlapping each other.

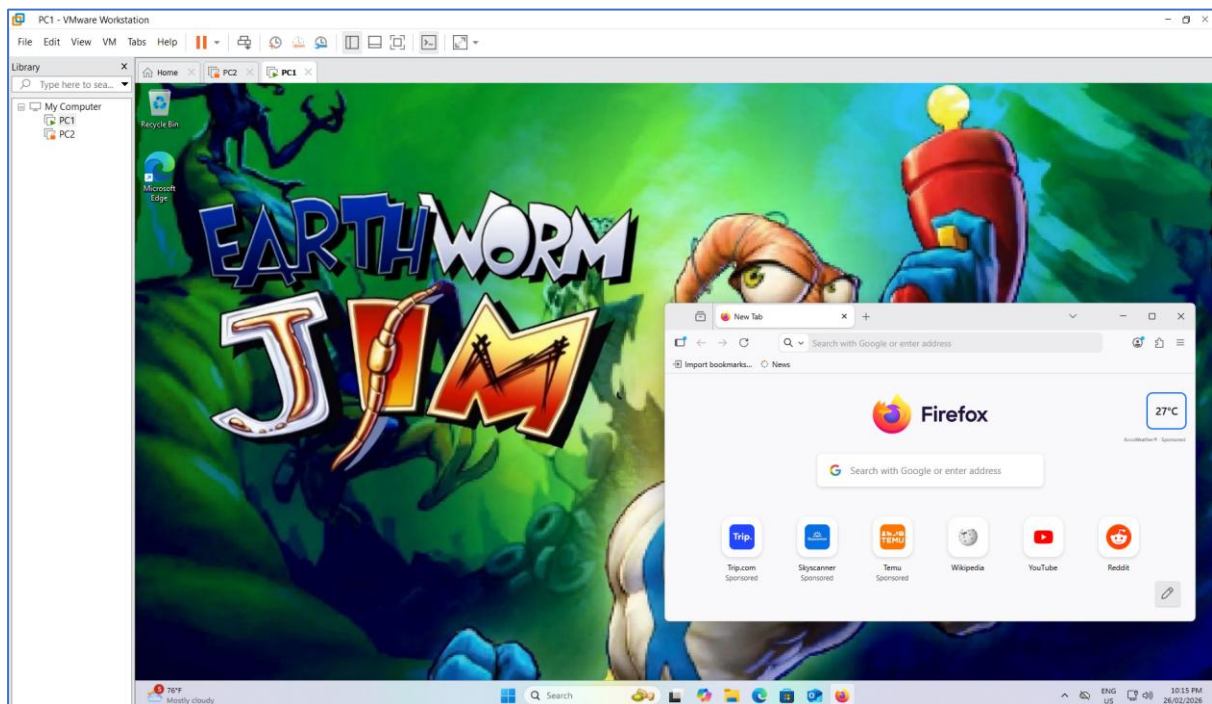

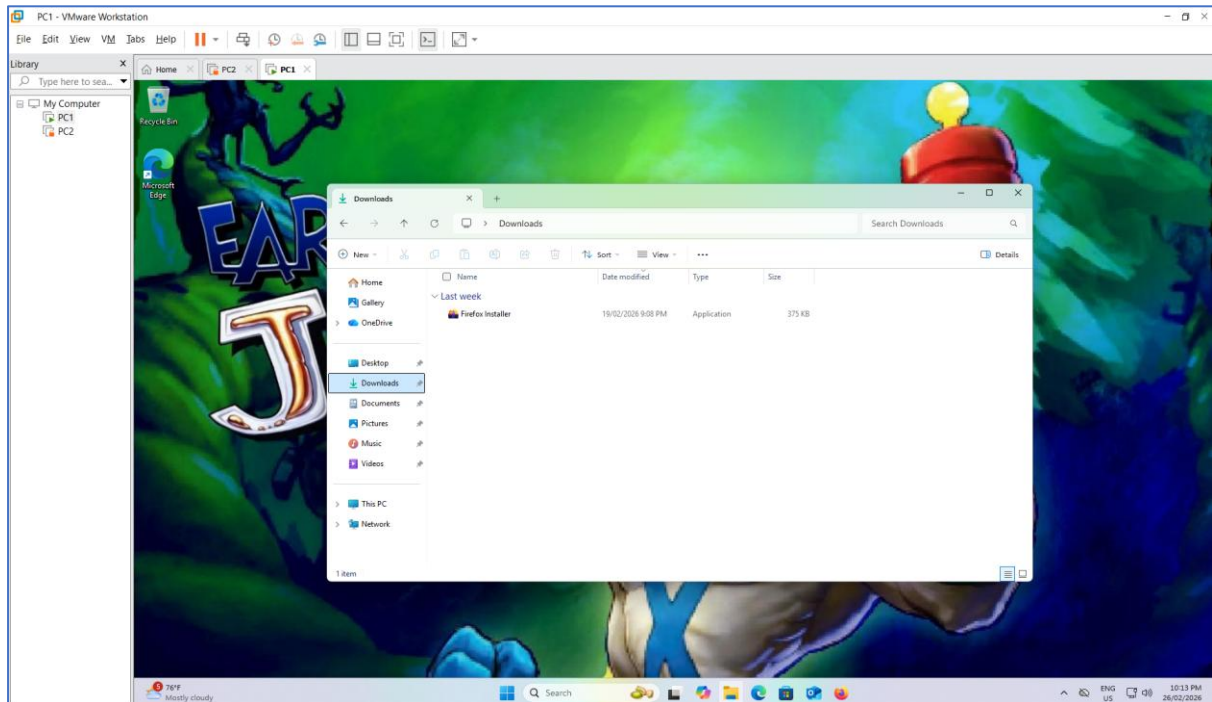

Task 1. Login to the PC1 virtual machine with user credentials.

Insert a screenshot showing the virtual machine name tab and the user's desktop below:

Task 2. Download and install Mozilla Firefox internet browser.

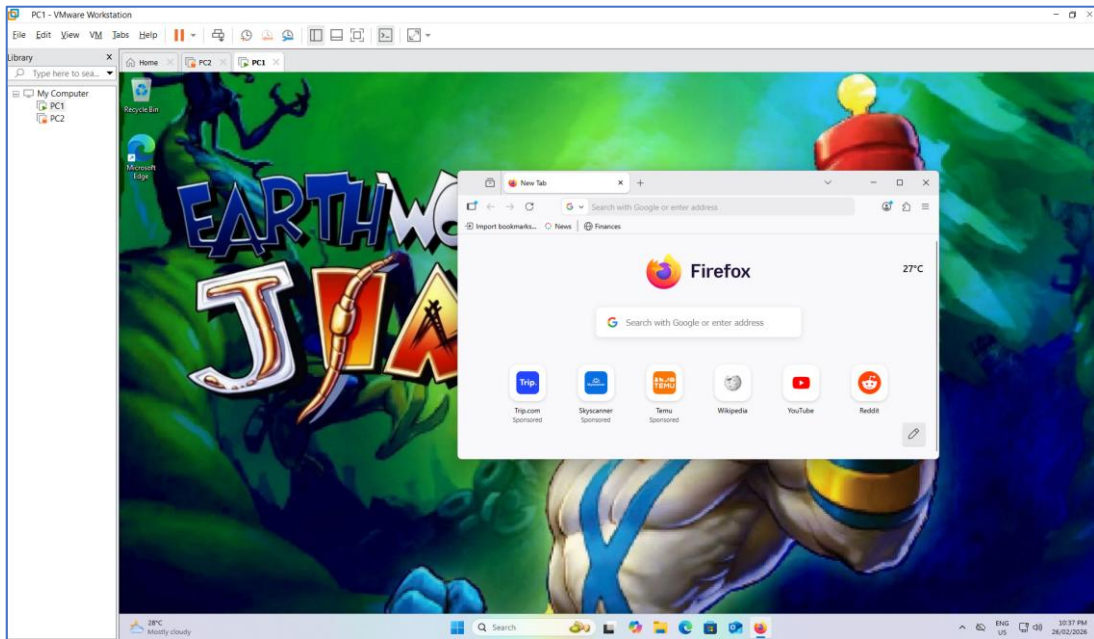

Insert a screenshot showing the virtual machine name tab and installed browser application below:

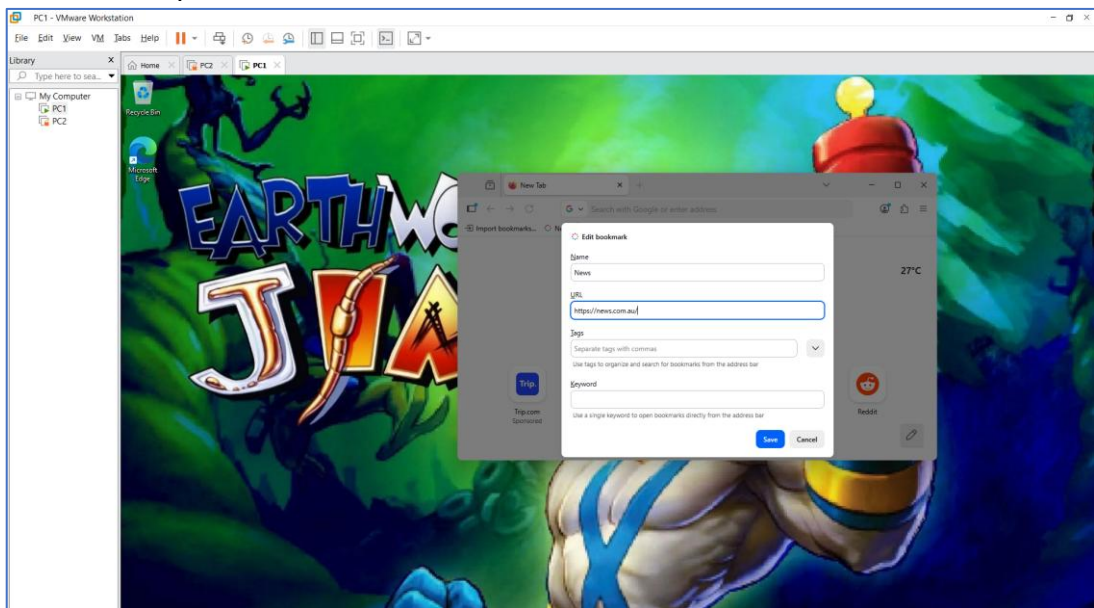

Task 3. Modify configuration as per following user requirements.

Insert screenshots demonstrating completion for each part of the modifications.

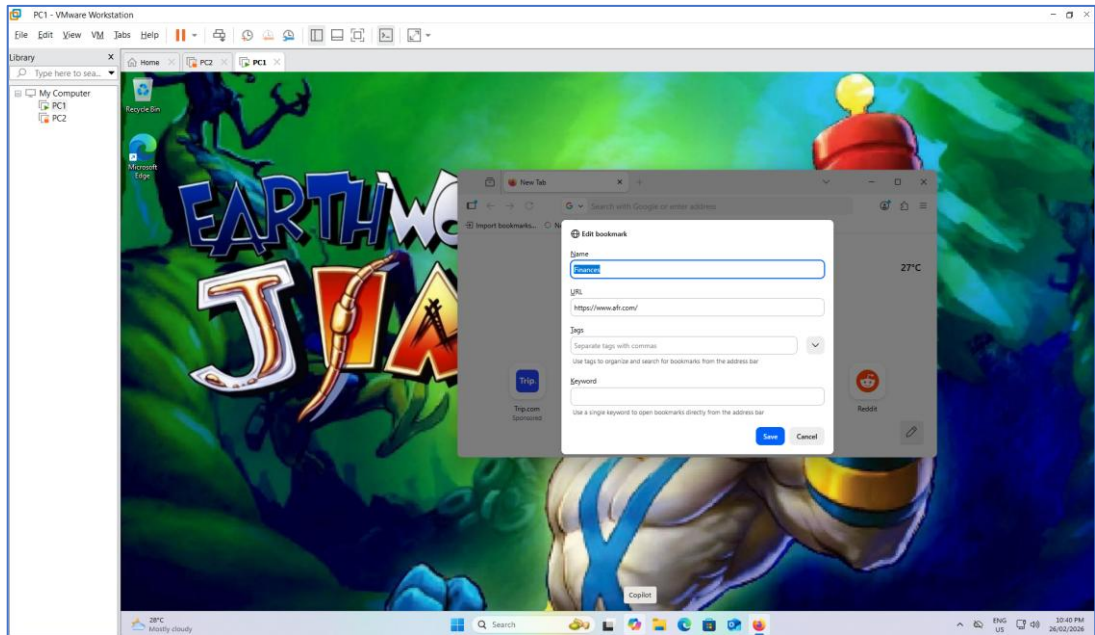

1. Enable the bookmarks bar, create 2 folders “News” and “Finances” and add a separator between folders.

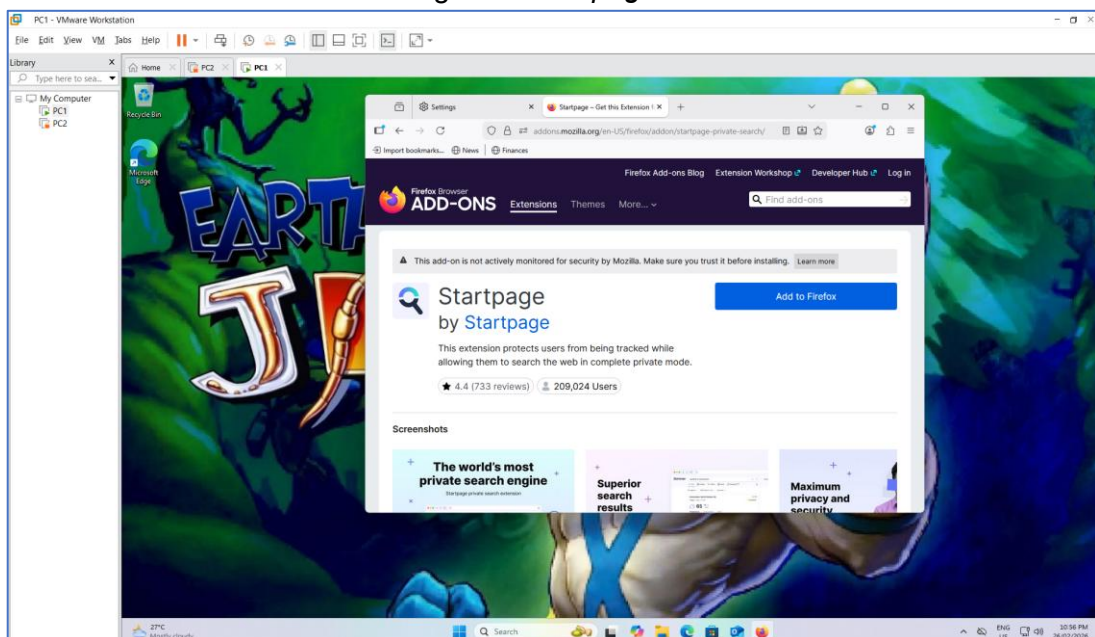

2. Bookmark <https://www.news.com.au/> website, add to the “News” folder

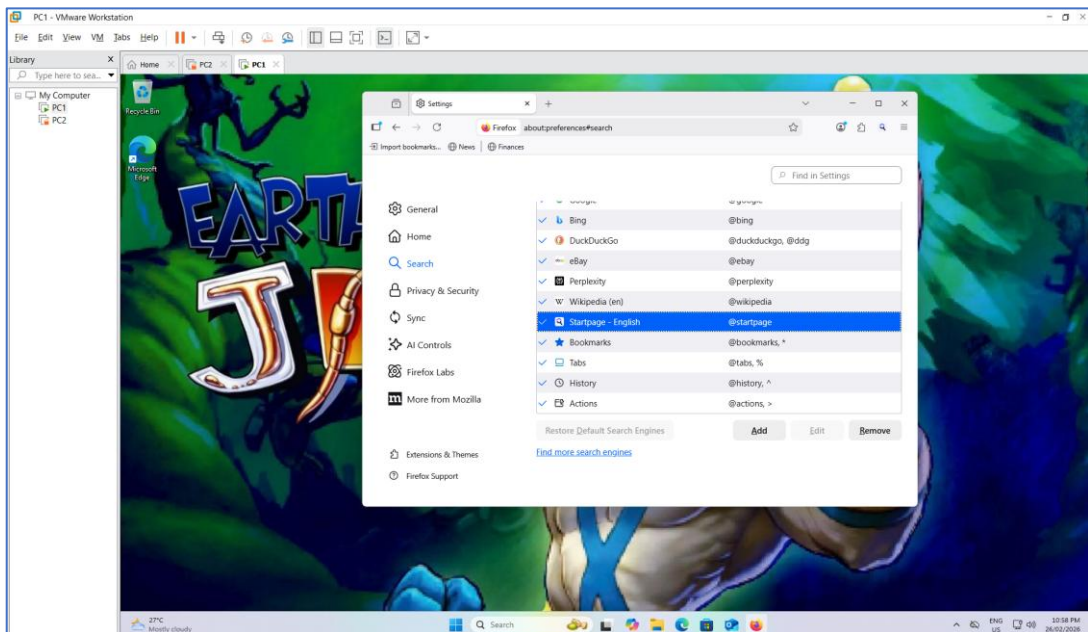

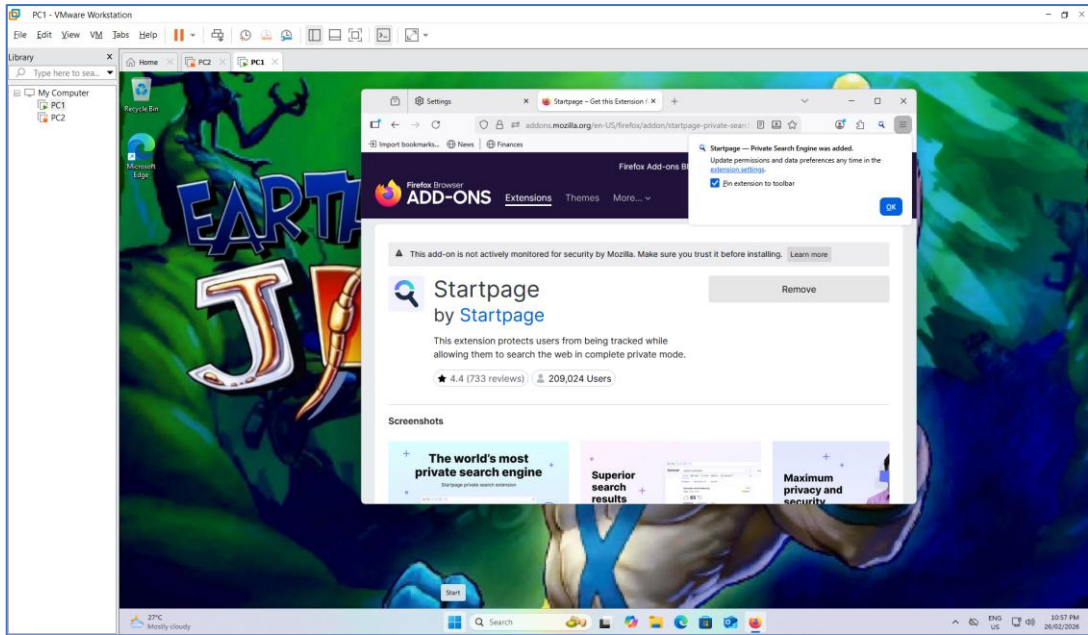

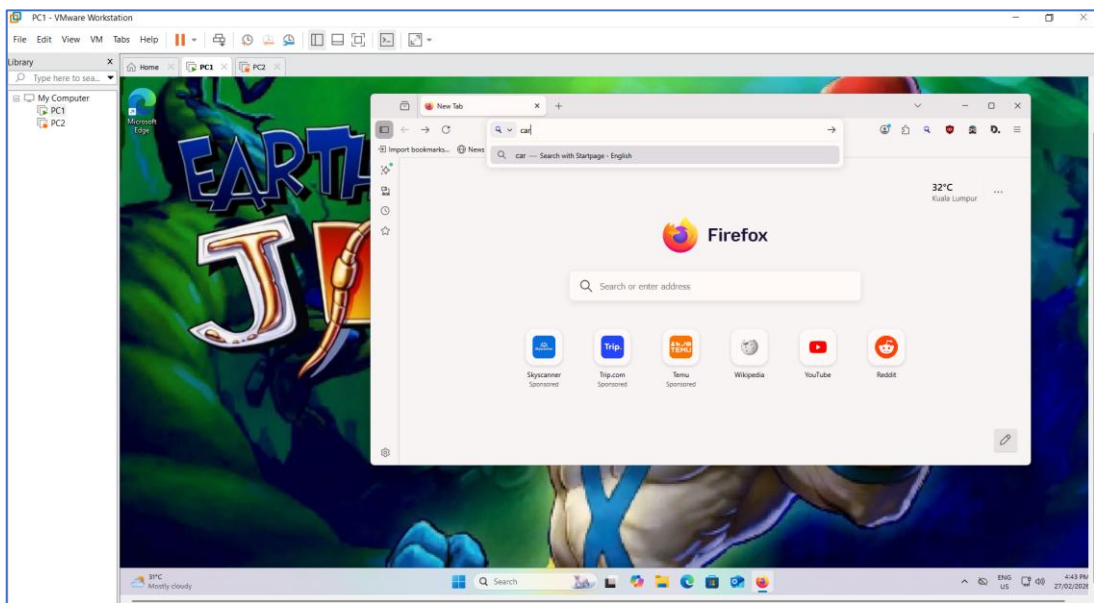

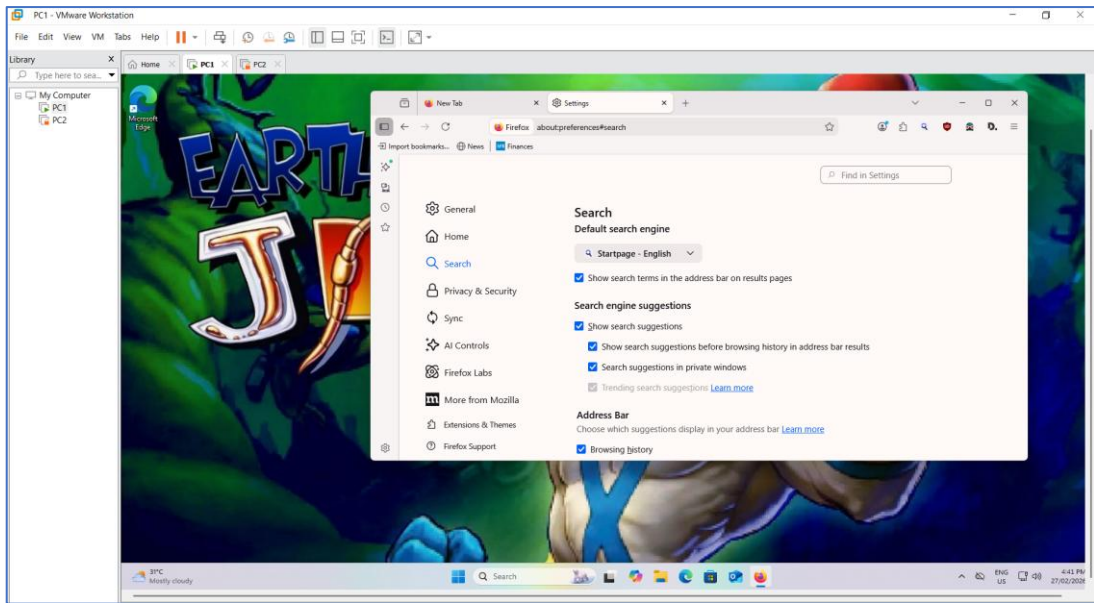

3. Bookmark <https://www.afr.com/> website, add to the “Finance” folder

4. Set the custom default search engine to *Startpage.com*

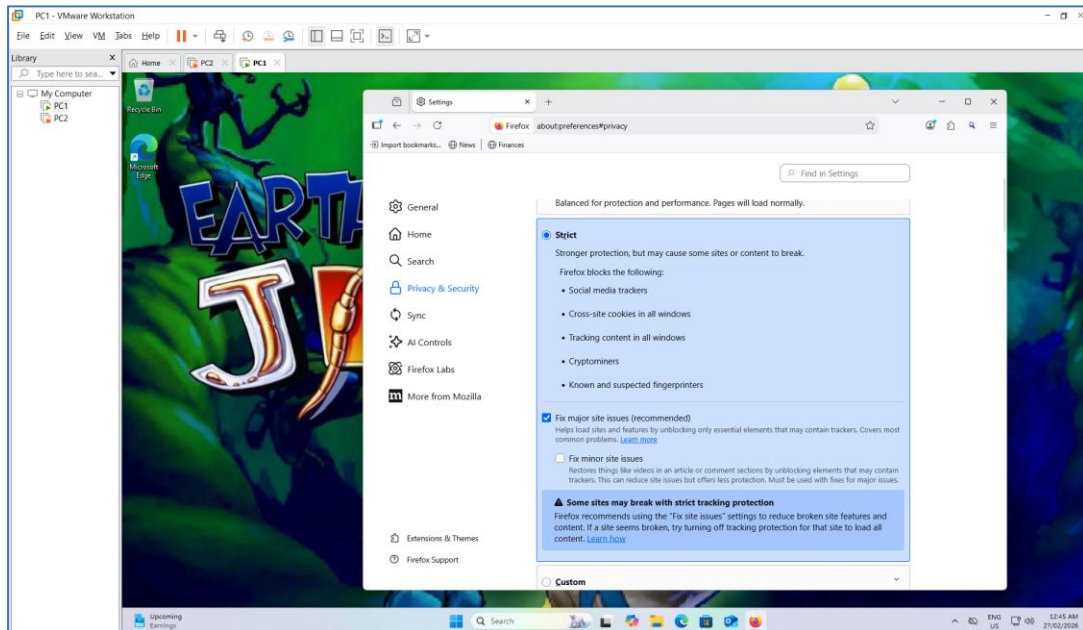

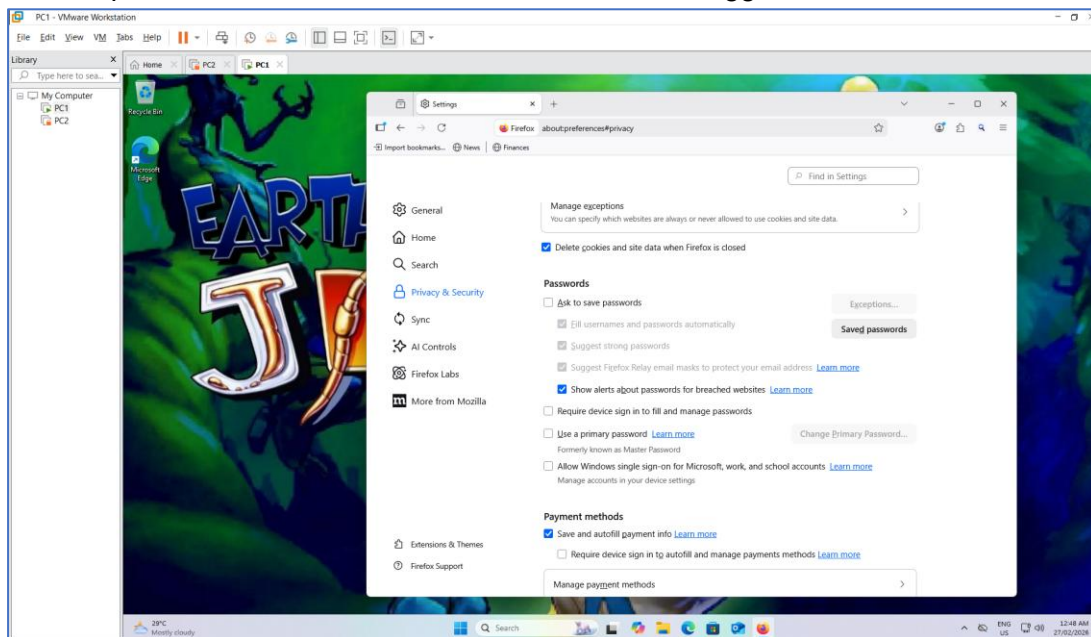

Task 4. Modify Privacy & Security settings. Insert screenshots demonstrating completion for each part of the settings.

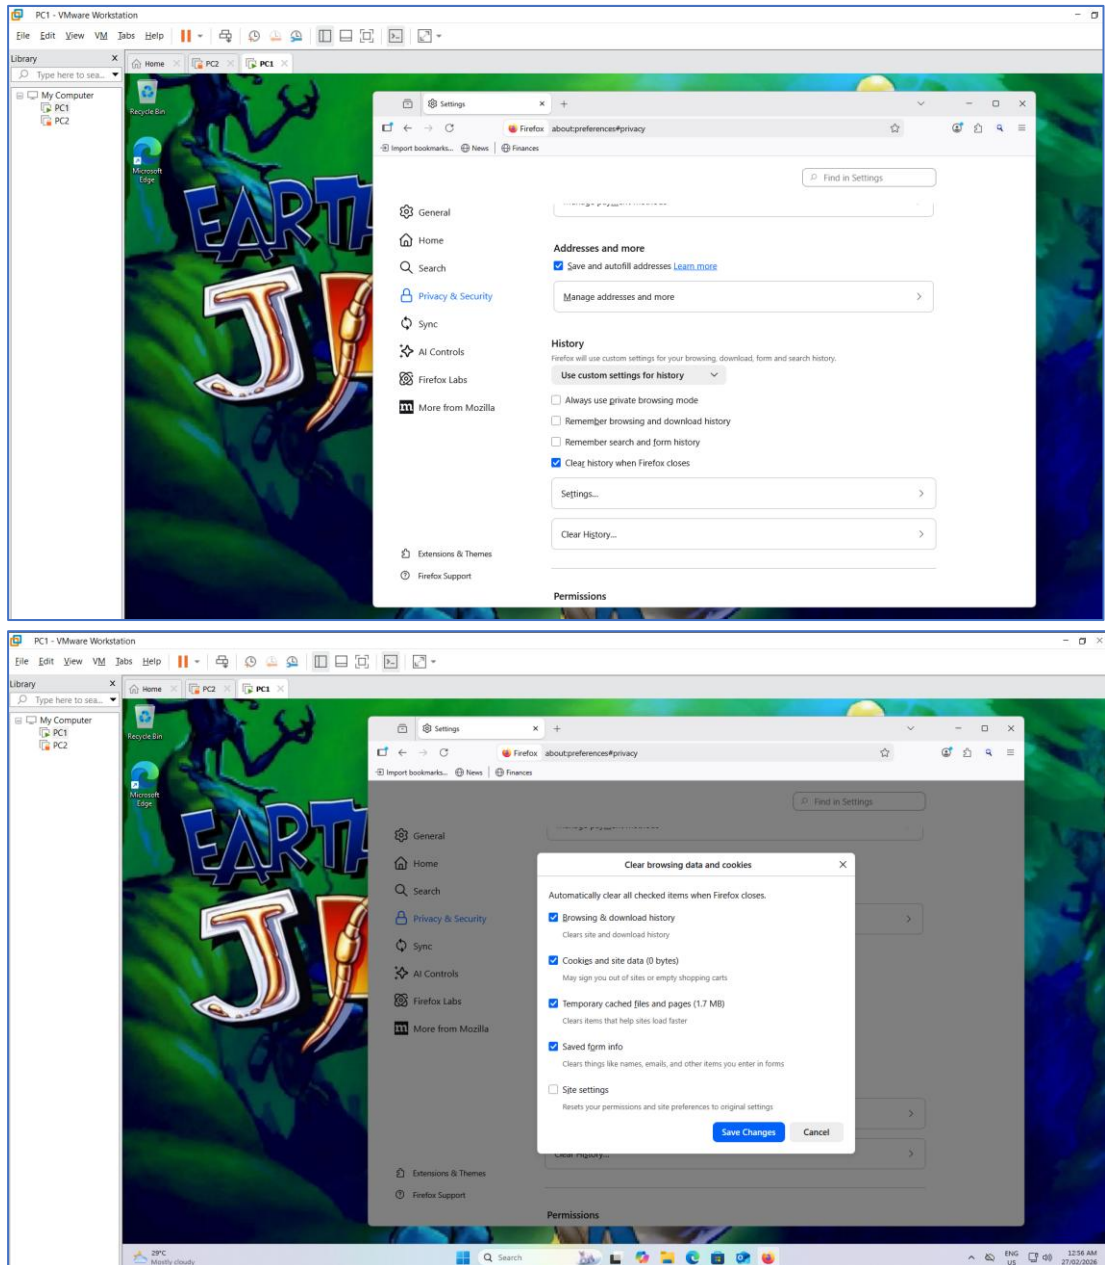

1. Set to "Strict"

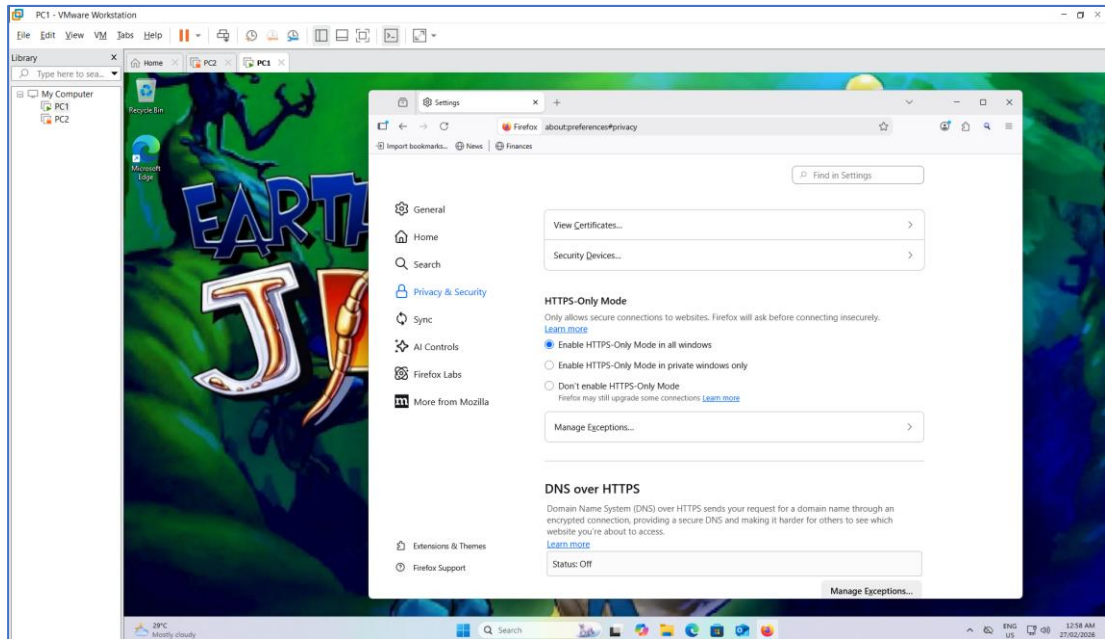

2. Disable password features: Ask to save, Autofill and Suggest

3. Delete browsing history, logins, cookies, and cache on exit

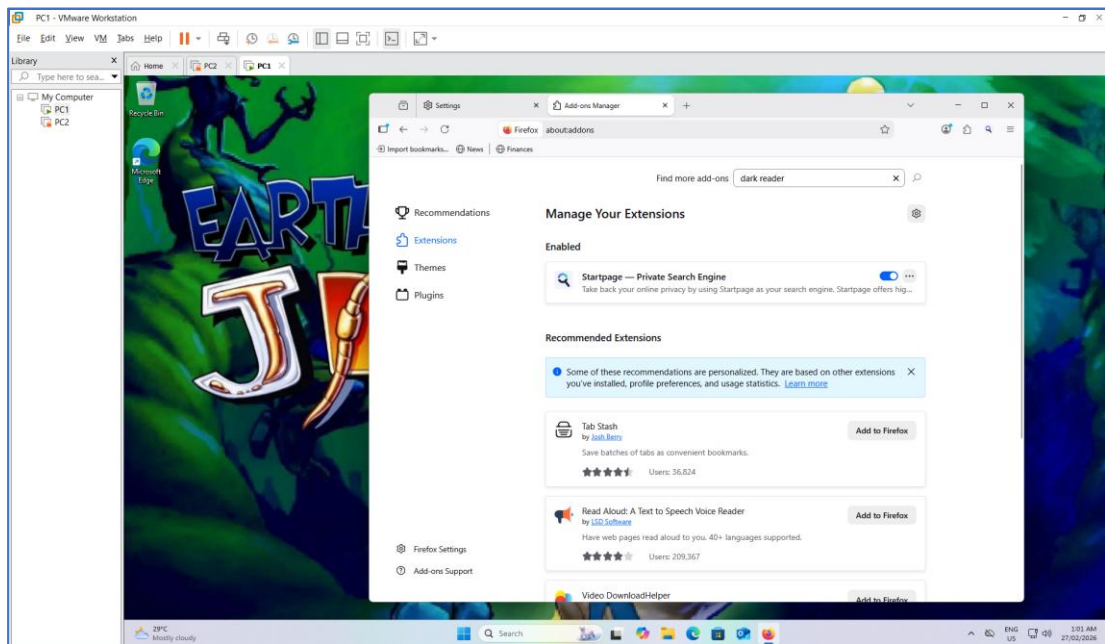

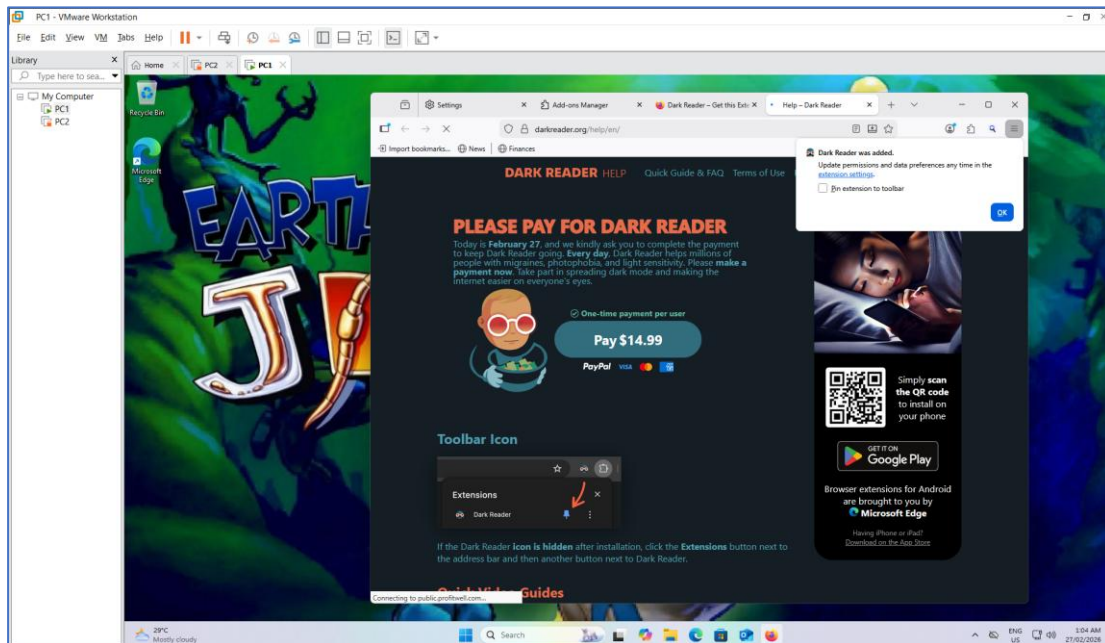

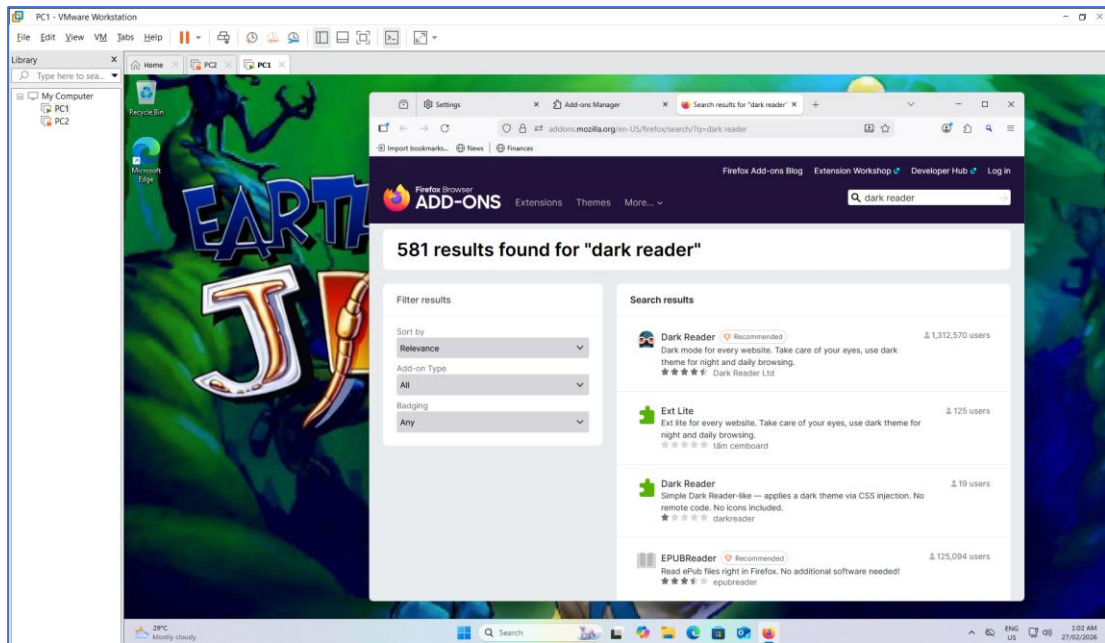

4. Enable HTTPS-Only Mode

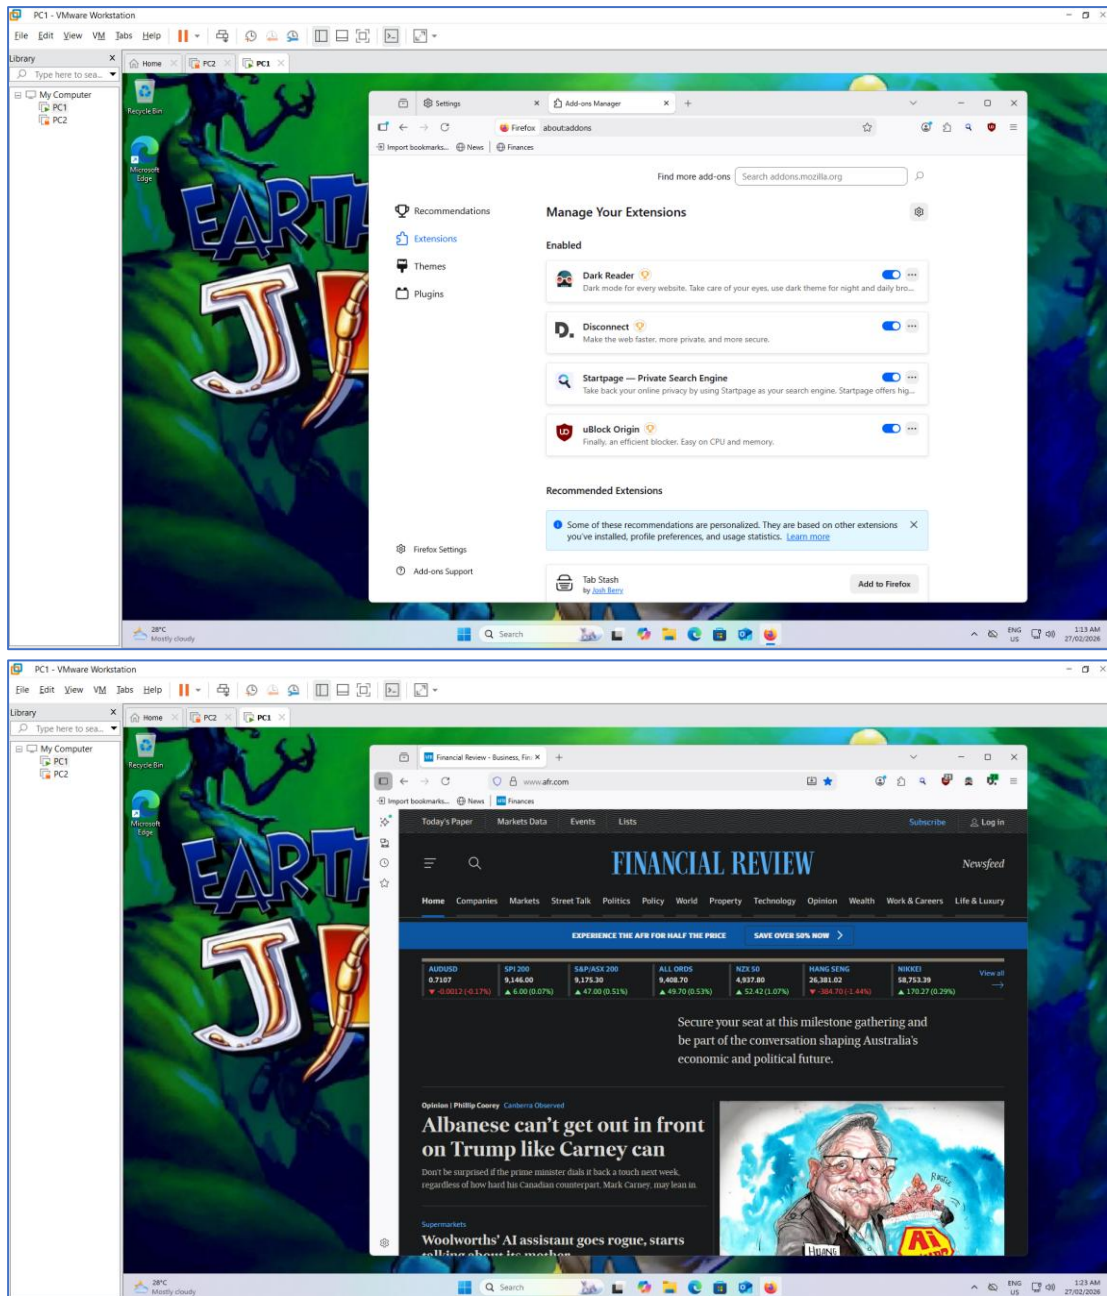

Task 5. Add and enable browser extensions. Insert a screenshot demonstrating completion for each part of the completed step.

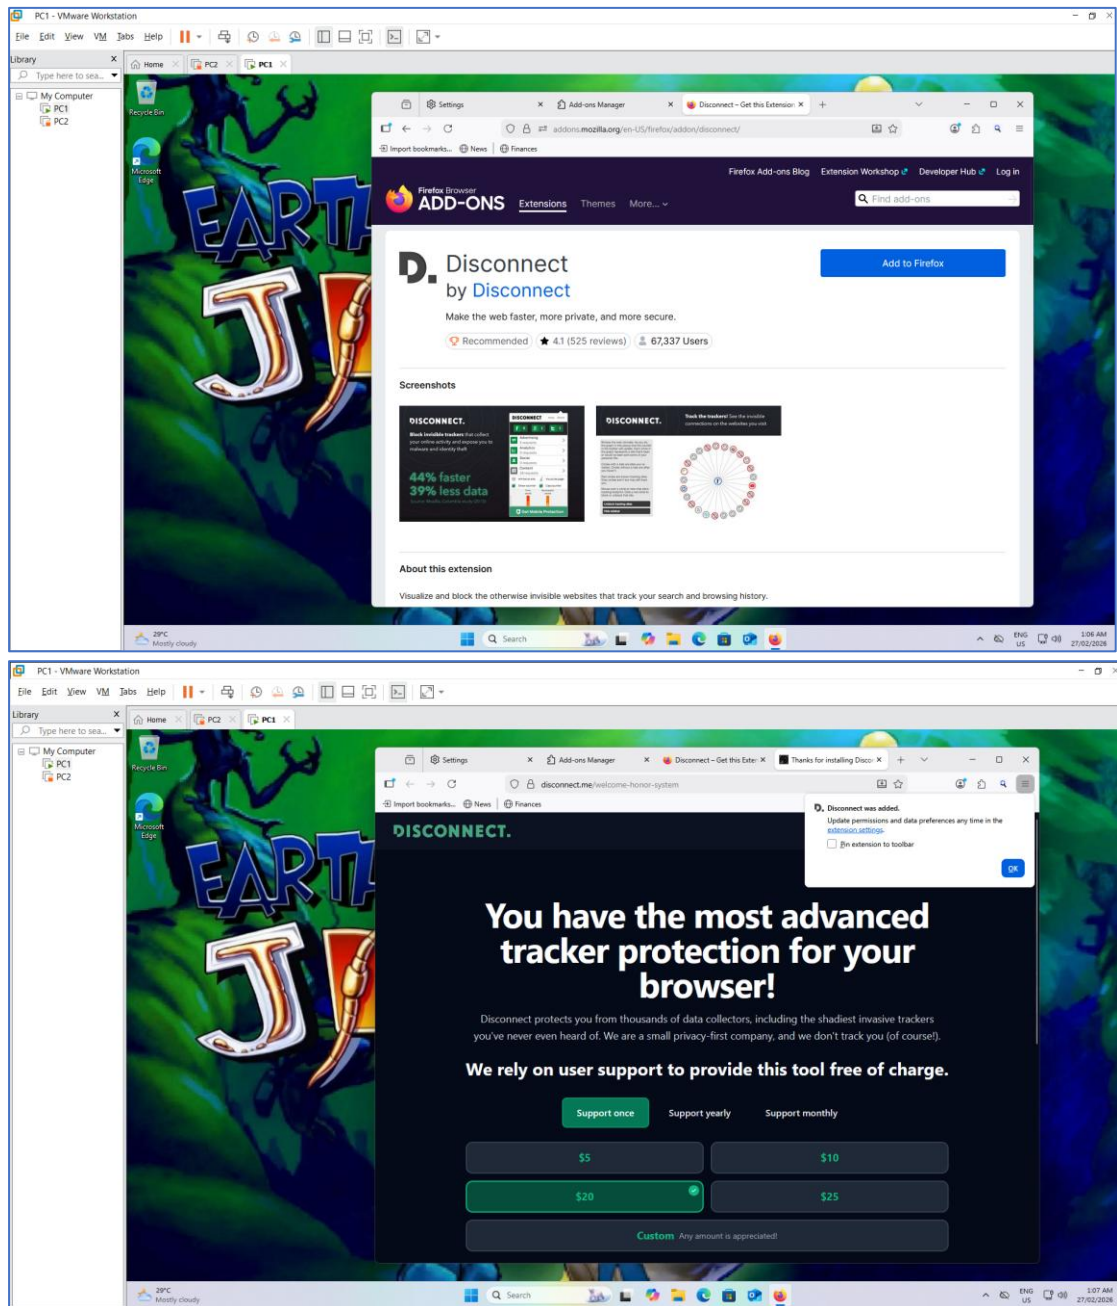

1. Dark Reader

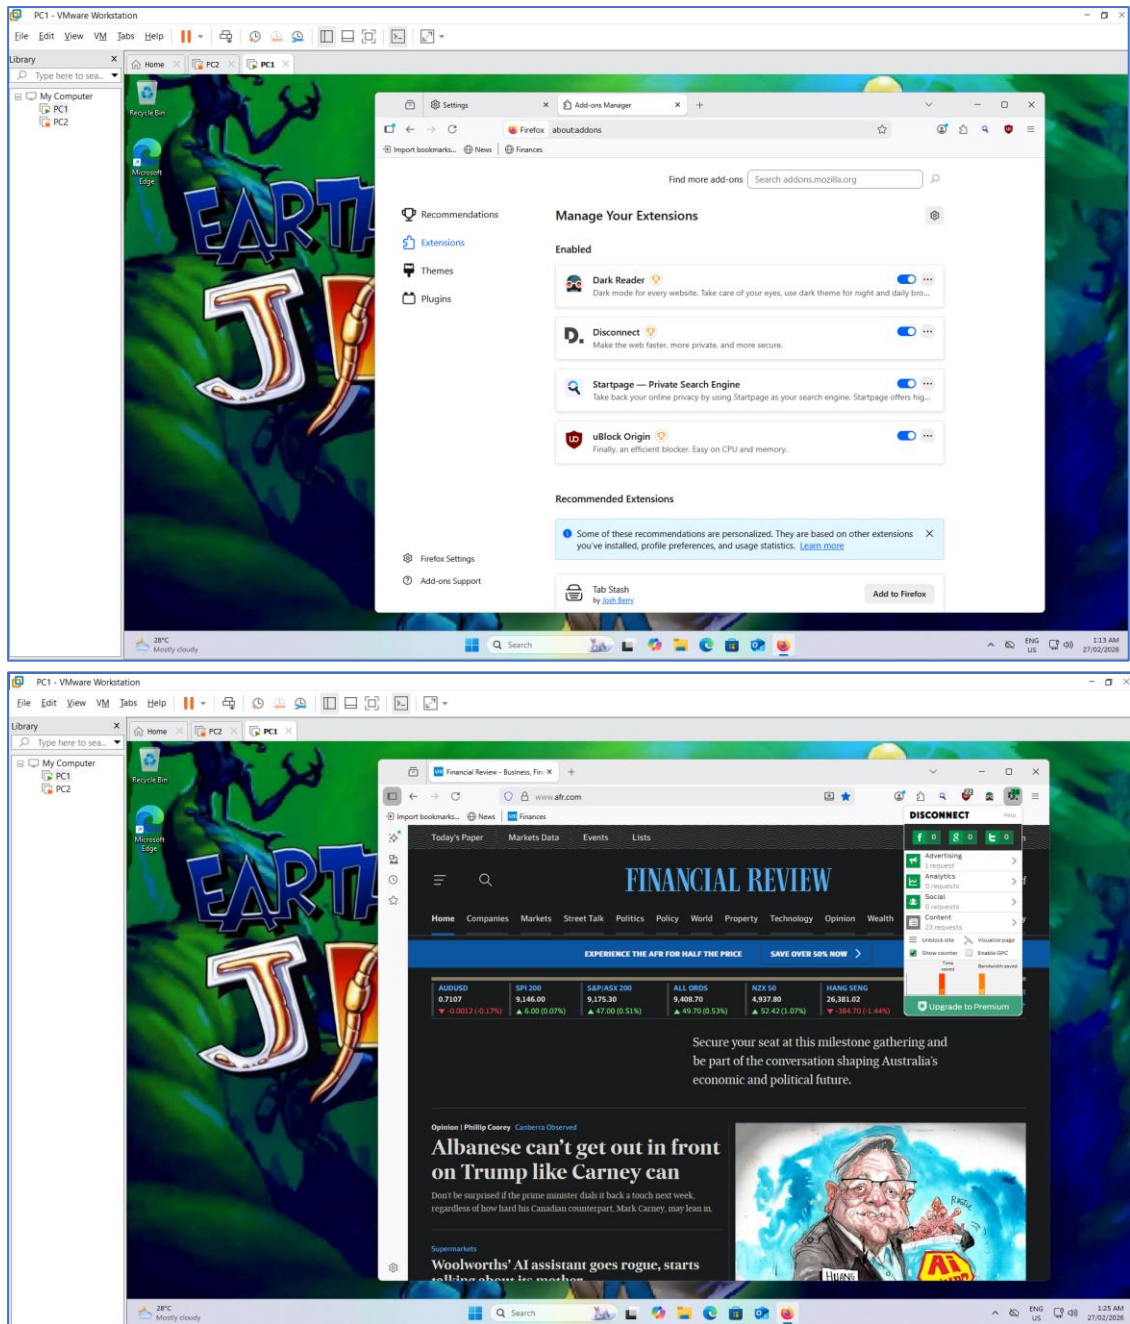

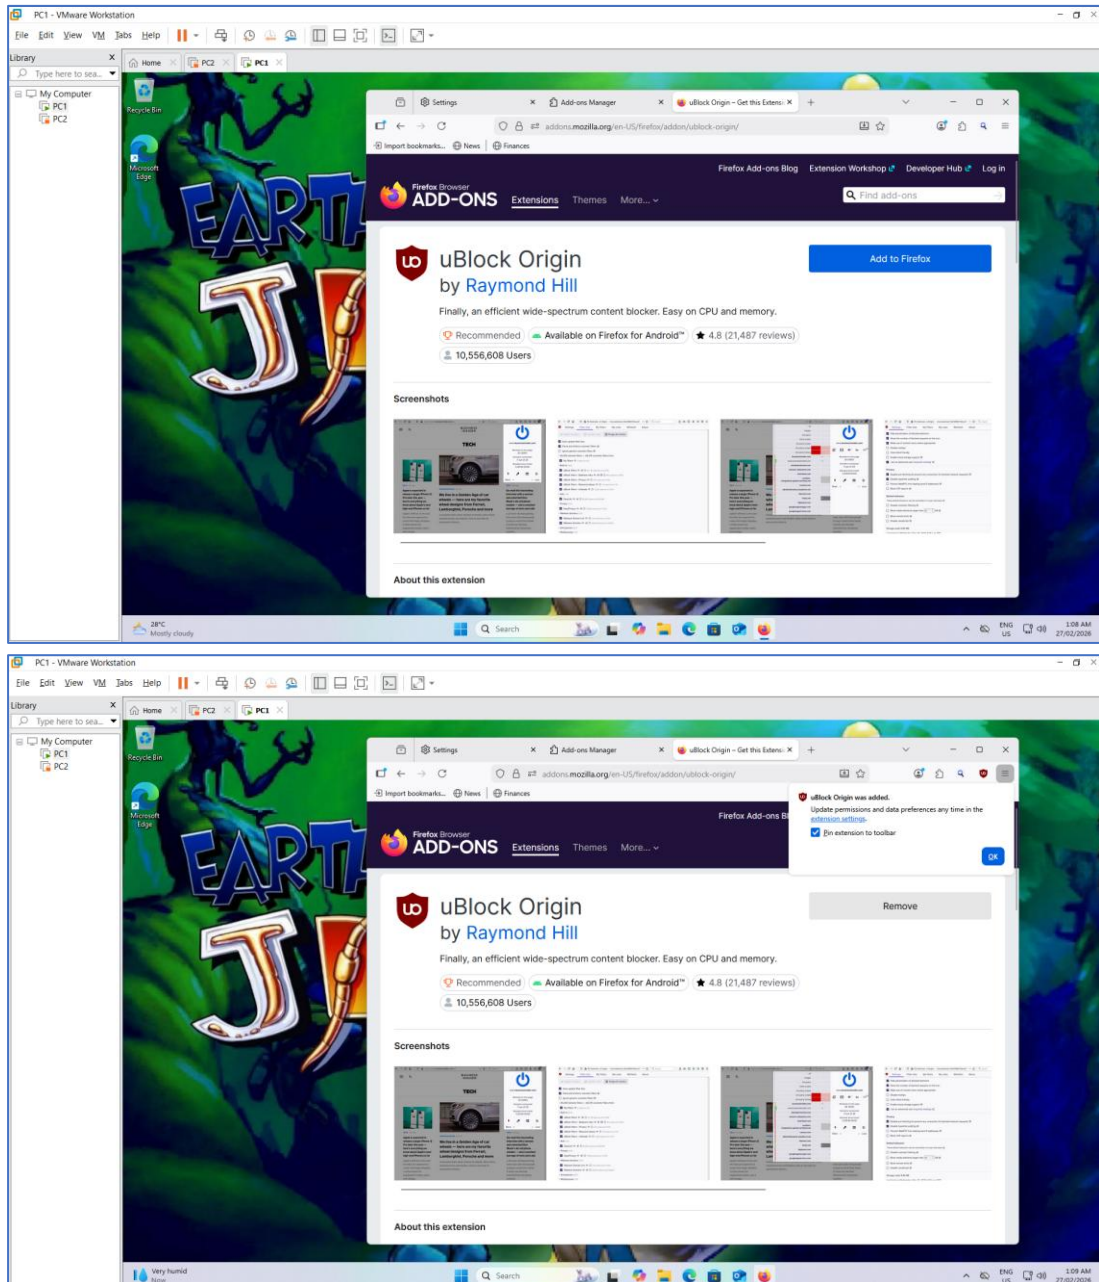

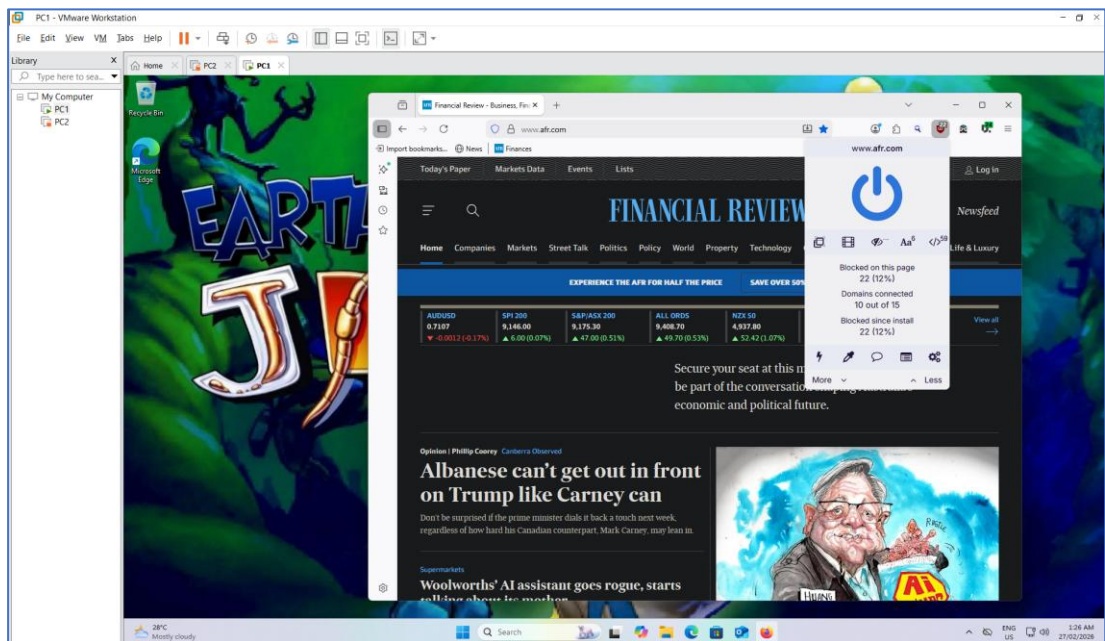

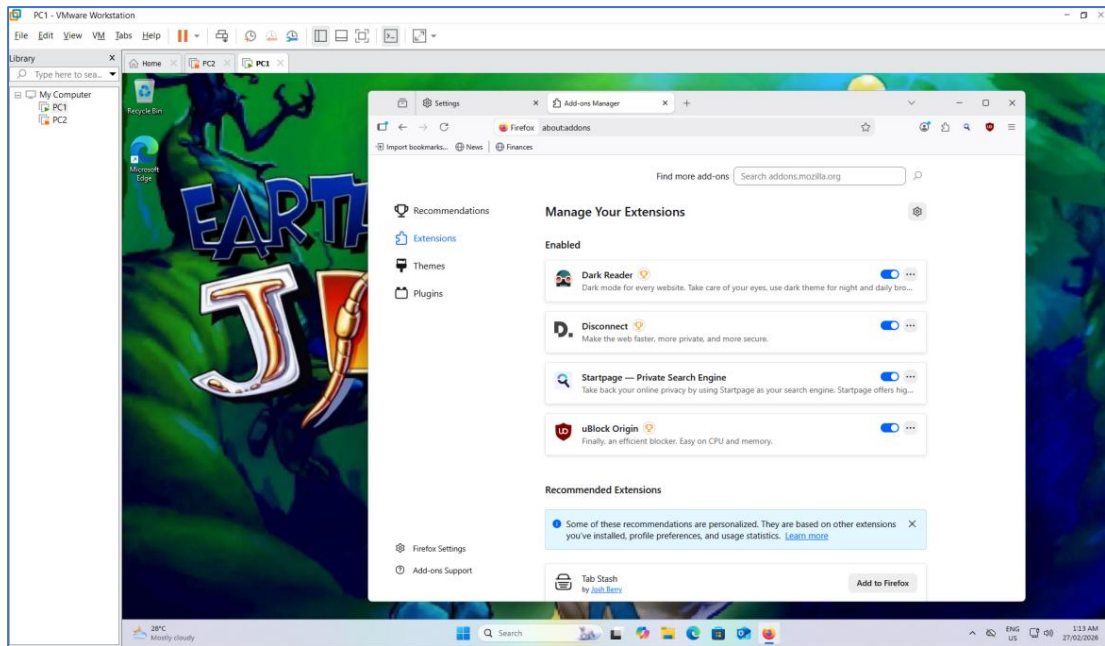

2. Disconnect

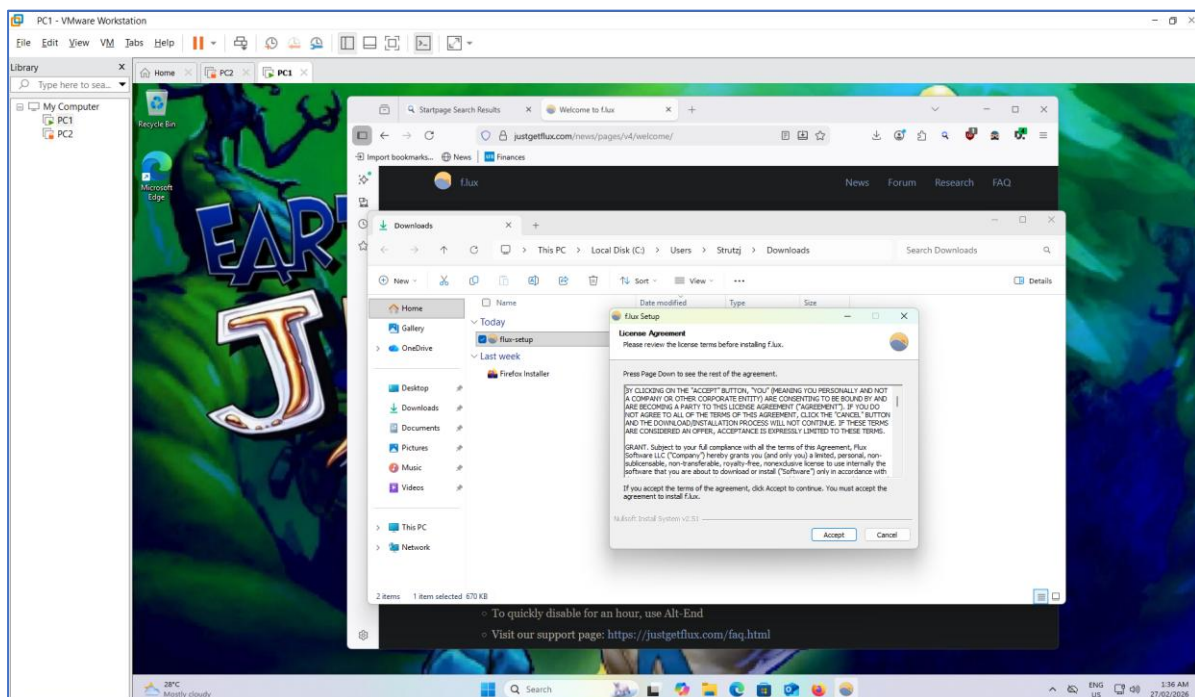

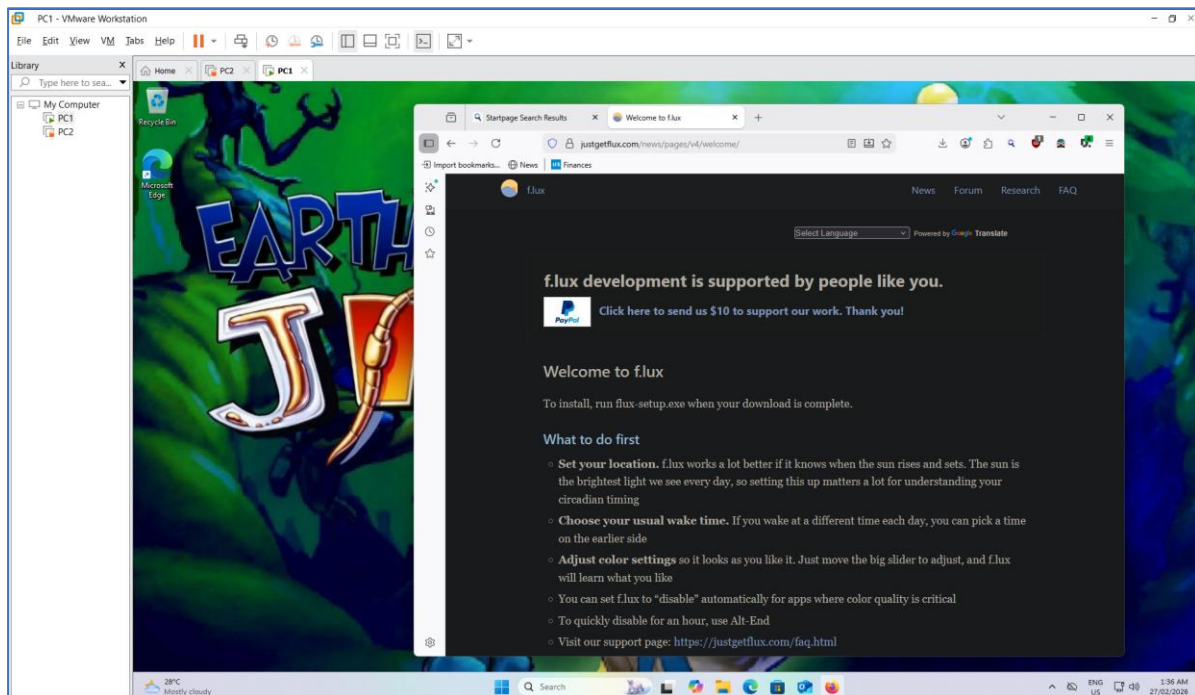

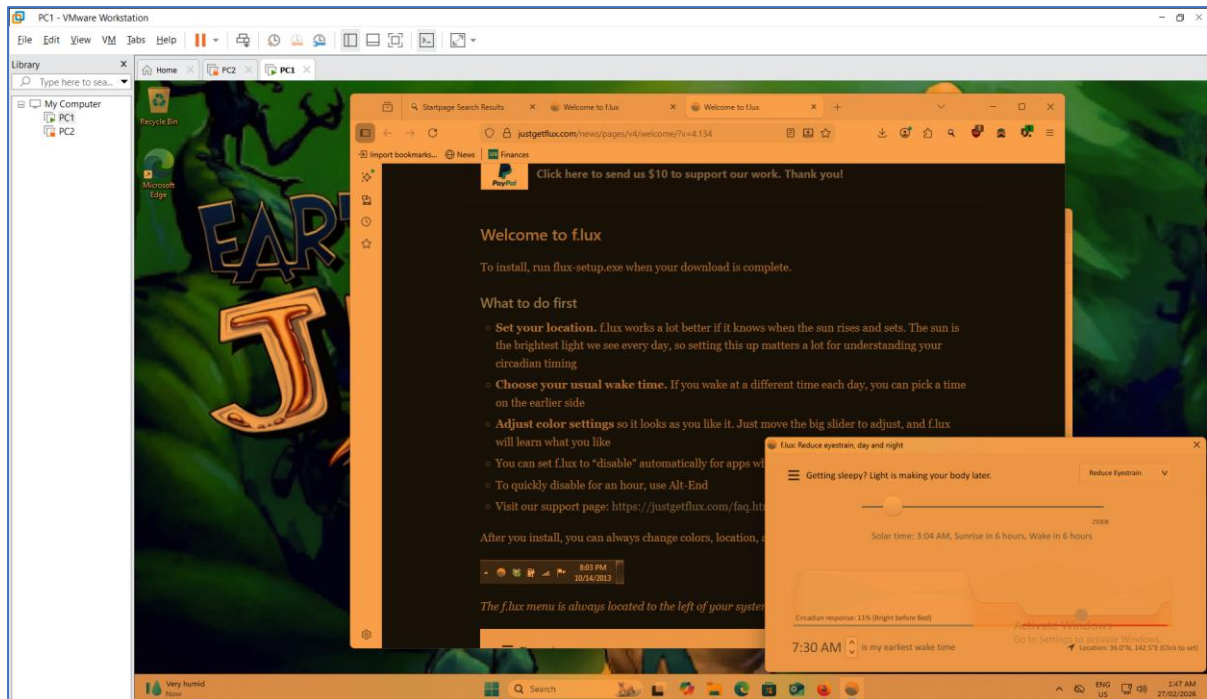

3. uBlock Origin

Task 6. Following ITWorks WHS guidelines, download and install the f.lux program designed to reduce eye strain during night-time use, helping to reduce disruption of sleep patterns. Set to “Reduce Eyestrain”. **Insert a screenshot of the completed installation and settings below:**

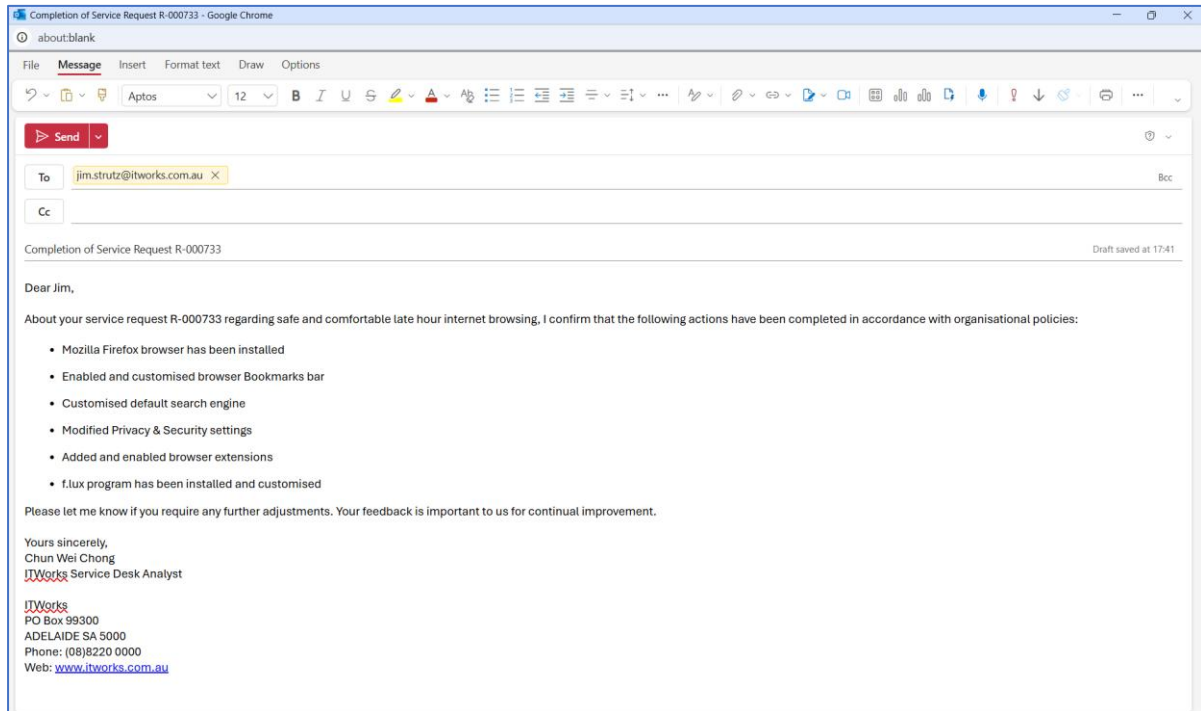

Task 7. Compose email (**do not send**) using ITWorks System Administration Manual and related policies and procedures E-mail guidelines informing the customer that the following elements of the request R-000733 given below have been completed:

- Mozilla Firefox browser has been installed
- Enabled and customised browser Bookmarks bar
- Customised default search engine
- Modified Privacy & Security settings
- Added and enabled browser extensions
- f.lux program has been installed and customised.

Insert a screenshot of your email below:

NOTE. Submit this file with all screenshots included. Remember that the screen captures are presented in a professionally formatted way and must be visible and not distorted.
